

Crosswind

The *Crosswind*, Current Designs' tandem rotomolded touring kayak is extremely stable, efficient and comfortable to use. It is affordable, durable and easily fits large or small paddlers. The well designed seat system and built-in thigh braces enable the paddlers to feel more connected and in control with the boat. The *Crosswind* is a perfect double kayak for day long or week long touring. Bow and stern bulkheads and hatches offer dry storage plus added buoyancy (in the unlikely event of a capsized). The *Crosswind* has a state of the art flip-up rudder system, deck rigging and full deck lines. This fine double kayak is very seaworthy and offers exceptional features above all other touring kayak in its class.
