

# Current Designs

## The Expedition

The Expedition is Current Designs' response to demands for a high performance kayak capable of carrying the loads necessary to sustain an expedition. Its design and performance have set new standards. At 18'10" long with a narrow beam, the Expedition is the ultimate combination of form and function. The sleek lines of the hull appear to carve the surface of the water. It pivots effortlessly and maneuvers with complete ease. One of the fastest ocean cruisers available, the Expedition increases efficiency by using its fish form to catch and run with swells. Its long waterline provides excellent tracking, while its full bow affords an extremely dry ride in all but the most severe conditions. It is an expert paddler's kayak designed to carry big loads.

The Expedition has travelled the inside passage from Alaska to Seattle and explored the Atlantic coastline from Georgia to Maine. It rates as one of the favorite designs among guides. If you seek a kayak that delivers long distance performance, the Expedition may be a good choice for you.

If you demand a boat that delivers ultimate performance and carrying capacity, paddle the Expedition.
