The Solstice GTS & GTSHV (High Volume)

The Solstice GTS is the sleeker sister to the Solstice GT. With a 22" beam, the GTS has a slender footprint in the water, gliding effortlessly; it offers a clean entry and exit.

Each Solstice GT feature adorns the smaller Solstice GTS: recessed deck fittings, rigging and perimeter lines as a safety feature.

The flush forward access hatch gives the deck a clean undisturbed look, and minimizes spray on the foredeck.

The hull has a shallow "V" cross sectional shape which gives the GTS good primary and excellent secondary stability while allowing a fun, responsive feel when making lean turns.

The Solstice GTS is easy to enter and exit. The cockpit offers a snug fit with molded thigh braces, a feature which gives additional control and comfort to the paddler by putting the paddler in contact with their craft.

The GTS is available in the standard volume or a higher volume version. With a 3/4 " deeper hull, this version will carry more gear and fit a slightly larger paddler.

Whether you plan to go day tripping or on a long expedition, the GTS is a fast, versatile and beautiful craft to paddle.
