The Solstice ST

The very essence of kayaking seems reflected in the fine lines and beauty of the Solstice ST.

The Solstice ST (Sport Touring) moves through the water with grace and precision, parting swells and waves with minimal effort. In heavy weather, its low profile assures stable and predictable performance, giving you great confidence. The fine entry of the hull through the water produces outstanding acceleration and speed, coupled with tracking that is a joy to experience.

The Solstice ST has been called classy and beautiful, but perhaps "exhilarating" describes it best. It comes alive on the open water.
