

Current Designs

The Storm (Rotomolded)

The Storm is Current Designs' first rotomolded plastic kayak. Designed and built to handle tremendous abuse, the Storm will offer years of maintenance free paddling at an affordable price. The Storm is a member of Current Designs' famous Solstice line of kayaks. It is beautifully appointed with features far superior to any other plastic kayak on the market today.

When paddling the Storm you will immediately feel comfortable with its stability, while sensing its lively hull wanting to perform. It glides effortlessly through the water with superb tracking yet excellent maneuverability. The Storm has been used on many extensive trips with tremendous success. A rugged linear polyethylene hull gives it a unique combination of strength, stiffness and impact resistance. Special ultraviolet stabilizers are added to the plastic to help prevent breakdown caused by the sun's ultra violet rays.

The Storm's recessed deck fittings accommodate a very clean deck rigging system with full perimeter deck lines. The rudder mounting and blade locator slot are molded right into the rear deck, thus eliminating any potential leak sources from screws. A unique uphaul/downhaul lever system for the fully retractable rudder blade makes using the rudder a breeze. Bow and stern hatches have a neoprene hatch cover which fits over the hatch flange. This provides a completely waterproof seal covered by a protective hard cover which is held in place with nylon webbing and buckles.

Lively, rugged, and affordable - the Storm sets a new standard for plastic kayaks.
